Escalation Watch Fourth Quarter 2012

Page 1:
Escalation Watch

The mid-November 2012 Non-residential Construction Price Indices were released by Statistics Canada on November 13th. The first quarter indices for 2013 will be available mid-May 2013.

The national composite index continues to show growth, rising again this quarter by 0.3%, up 0.4 points from 151.0 to 151.4. Expressed year over year the national composite index is up 2.1% over the same period in 2011. The national composite year over year pace of increase has been steadily slowing over the past four quarters from 4.1% reported in the fourth quarter of 2011 to the current rate of 2.1%. It appears that the national trend toward slower growth noted in our last few newsletters is continuing.

Although the composite indices for all cities tracked by Stascan continue quarterly and year over year gains, the rate of growth has slowed markedly in each city except Montreal which is reporting a moderate year over year increase of 1.6%, up from 1.3% the previous survey.

As noted in previous issues, the trend toward recovering all the ground lost since mid-2008 is continuing, even if at a slower pace. In eastern Canada, Halifax, Montreal, Ottawa and Toronto are all back in the black. In western Canada, the recovery continues, but with much more ground to cover, we still believe that Calgary, Edmonton and Vancouver will not likely see mid-2008 values until the 3rd or 4th quarter of this year.

It bears remembering that the indices prepared for Statistics Canada are intended only to track cost changes in a given city. The index *cannot* be used to compare costs between cities.

The source data used to prepare the charts in this newsletter is drawn from Statistics Canada's Capital Expenditures Price Statistics publication – catalogue 62-007-XWE. Specifically, we used the Non-residential Building Construction Price Indexes for the national composite and each surveyed city indicated on tables 7.2 through 7.9. Readers are cautioned that Statistics Canada does, on occasion, restate indices from previous quarters. Individual city and national composite indices reported in this newsletter reflect these changes. Indices restated from the previous report are highlighted for ease of reference where appropriate.

More information about this and other construction related indices published by Statistics Canada are available online at www.statcan.gc.ca.
